

SDET Interview Question Bank

301 Questions · 19 Topics · Easy / Medium / Hard

Java · Selenium · Appium · Playwright · REST Assured · Jenkins · Docker · CI/CD · System Design

104 Easy	158 Medium	39 Hard	301 Total	19 Topics
--------------------	----------------------	-------------------	---------------------	---------------------

Contents

1.	Java core	20 questions	8E 10M 2H
2.	Java streams	15 questions	5E 8M 2H
3.	Selenium	20 questions	8E 10M 2H
4.	Appium	16 questions	7E 6M 3H
5.	Playwright + TypeScript	18 questions	5E 10M 3H
6.	REST Assured	16 questions	6E 8M 2H
7.	API testing concepts	14 questions	4E 8M 2H
8.	Framework design	14 questions	3E 9M 2H
9.	Jenkins	18 questions	6E 10M 2H
10.	Cucumber / BDD	18 questions	6E 9M 3H
11.	TestNG in depth	17 questions	6E 10M 1H
12.	SQL for testers	17 questions	6E 9M 2H
13.	Docker	15 questions	5E 8M 2H
14.	CI/CD concepts	15 questions	5E 8M 2H
15.	Maven	14 questions	6E 6M 2H
16.	Gradle	13 questions	5E 6M 2H
17.	Git	15 questions	6E 7M 2H
18.	System design	12 questions	3E 6M 3H
19.	Behavioral	14 questions	4E 10M 0H

1. JAVA CORE

8 Easy 10 Medium 2 Hard — 20 total questions

1	What is the difference between == and .equals() in Java? When would each behave differently?	Easy
2	Explain the difference between HashMap, LinkedHashMap, and TreeMap. When would you choose each?	Easy
3	What is the difference between ArrayList and LinkedList? Which is better for test data storage and why?	Easy
4	Explain method overloading vs method overriding with examples.	Easy
5	What is the difference between abstract class and interface in Java 8+?	Easy
6	What are checked vs unchecked exceptions? Give examples relevant to test automation.	Easy
7	Explain static keyword — static methods, static variables, static blocks.	Easy
8	What is the difference between final, finally, and finalize?	Easy
9	How does HashMap work internally? What happens during collision?	Med
10	Explain the difference between synchronized method and synchronized block. Which is better for test parallelism?	Med
11	What is volatile keyword and when would you use it in test automation?	Med
12	Explain ThreadLocal and give a real use case in a Selenium/Playwright parallel framework.	Med
13	What is the difference between Comparable and Comparator? Write code to sort Employee objects by salary.	Med
14	What is ConcurrentHashMap and why is it safer than HashMap in parallel test execution?	Med
15	Explain Java memory model — heap, stack, method area. What goes where?	Med
16	What design patterns have you used in your framework? Explain Singleton, Factory, Builder with code.	Med
17	Explain ExecutorService and how you would use it to run tests in parallel.	Med
18	What is the difference between wait(), sleep(), and join() in multithreading?	Med
19	Explain CountdownLatch and how it is useful in parallel test execution.	Hard
20	What is CompletableFuture? How would you use it to run multiple API calls concurrently in a test?	Hard

2. JAVA STREAMS

5 Easy 8 Medium 2 Hard — 15 total questions

1	What is the difference between map() and flatMap()? Give a real automation example.	Easy
---	---	------

2	Explain the difference between intermediate and terminal operations. Give 3 examples of each.	Easy
3	How do you filter a list of Employee objects to get only those with salary > 50000?	Easy
4	Find the employee with the highest salary using streams. Write the code.	Easy
5	What is the difference between findFirst() and findAny()? When does findAny() behave differently?	Easy
6	How does Collectors.groupingBy() work? Group a list of test results by status.	Med
7	Find the second highest salary in a list of employees using streams.	Med
8	What is the difference between reduce() and collect()? When would you use each?	Med
9	How would you use streams to find duplicate test case IDs in a large list?	Med
10	Explain Collectors.partitioningBy() vs groupingBy(). Give a testing-specific example.	Med
11	How do parallel streams work? What are the risks of using them in test automation?	Med
12	Write a stream pipeline to group transactions by year and sum amounts per year.	Med
13	What is the difference between stream() and parallelStream()? When would you avoid parallel streams?	Med
14	How would you implement a custom Collector? Give a scenario where built-in collectors are not enough.	Hard
15	What is Collectors.teeing()? Write an example that calculates sum and count in one pass.	Hard

3. SELENIUM

8 Easy 10 Medium 2 Hard — 20 total questions

1	What is the difference between driver.close() and driver.quit()?	Easy
2	What are the different types of locators in Selenium? Which do you prefer and why?	Easy
3	What is the difference between findElement() and findElements()? What happens when element is not found?	Easy
4	Explain implicit wait, explicit wait, and fluent wait. Which should you use and why?	Easy
5	What is StaleElementReferenceException? Why does it occur and how do you handle it?	Easy
6	What is the difference between Selenium 3 and Selenium 4? What new features did Selenium 4 introduce?	Easy
7	How do you handle dropdowns in Selenium using Select class? What if it is a custom dropdown?	Easy
8	How do you handle frames and iframes in Selenium?	Easy
9	How do you handle multiple browser windows or tabs in Selenium?	Med

10	How do you handle alerts, confirms, and prompts in Selenium?	Med
11	Explain Actions class in Selenium. Give 3 real use cases — hover, drag-drop, right-click.	Med
12	How do you handle file uploads and downloads in Selenium?	Med
13	How do you execute JavaScript in Selenium? When is it necessary vs when is it a bad practice?	Med
14	What is WebDriverManager and why is it better than managing driver binaries manually?	Med
15	How do you implement cross-browser testing with Selenium Grid? Explain hub and node architecture.	Med
16	How do you take screenshots on test failure and attach them to reports?	Med
17	What is Page Factory and @FindBy annotation? How does it differ from standard POM?	Med
18	How do you run Selenium tests in headless mode? When would you use it?	Med
19	How do you handle dynamic XPaths? Give 3 strategies for unstable locators.	Hard
20	Design a Selenium framework with TestNG, POM, ExtentReports, and parallel execution. Walk through every layer.	Hard

4. APPIUM

7 Easy 6 Medium 3 Hard — 16 total questions

1	What is Appium? How is it different from Selenium?	Easy
2	What is the difference between native, hybrid, and mobile web apps? How does testing differ for each?	Easy
3	What are Appium desired capabilities? Name 5 important ones for Android testing.	Easy
4	What is the difference between UIAutomator2 and Espresso drivers for Android?	Easy
5	What is XCUITest driver for iOS? What are the prerequisites to run iOS tests?	Easy
6	How do you find elements in Appium? What locator strategies are available for mobile?	Easy
7	What is appium:noReset and appium:fullReset capability? What is the difference?	Easy
8	How do you handle gestures in Appium — swipe, scroll, pinch, long press?	Med
9	How do you switch between native and webview context in a hybrid app?	Med
10	How do you run Appium tests on real devices vs emulators/simulators? What are the trade-offs?	Med
11	How do you take screenshots and record video in Appium tests?	Med
12	What is Appium Inspector? How do you use it for element identification?	Med
13	How do you handle deep links in mobile app testing using Appium?	Med

14	How would you set up parallel mobile testing across multiple devices?	Hard
15	How do you integrate Appium with cloud platforms like BrowserStack or Sauce Labs? What changes in your framework?	Hard
16	Design a mobile test framework supporting both Android and iOS with shared test logic.	Hard

5. PLAYWRIGHT + TYPESCRIPT

5 Easy 10 Medium 3 Hard — 18 total questions

1	Explain the Page Object Model. Why is it important and what problem does it solve?	Easy
2	What is the difference between locator() and \$() in Playwright? Which should you prefer and why?	Easy
3	How do you handle dynamic elements that appear after an async operation in Playwright?	Easy
4	What is auto-waiting in Playwright? How is it different from explicit waits in Selenium?	Easy
5	How do you run tests in parallel in Playwright? What configuration is needed?	Easy
6	Explain Playwright fixtures. How do you create a custom fixture and what is its lifecycle?	Med
7	How do you handle browser contexts in Playwright? When would you use multiple contexts in one test?	Med
8	How do you test file downloads and uploads in Playwright?	Med
9	How do you intercept and mock API calls in Playwright tests?	Med
10	Explain the difference between page.waitForResponse() and page.waitForRequest().	Med
11	How do you handle authentication in Playwright? Explain storageState and why it improves performance.	Med
12	How would you implement data-driven testing in Playwright with TypeScript?	Med
13	How do you integrate Playwright with CI/CD? What configurations matter in GitHub Actions?	Med
14	How do you handle flaky tests in Playwright? What strategies do you use?	Med
15	Explain Playwright tracing feature. How would you use it in debugging CI failures?	Med
16	How do you design a Playwright framework to support multiple environments?	Hard
17	How would you implement visual regression testing in Playwright? What are the limitations?	Hard
18	Design a Playwright framework from scratch for a financial services application.	Hard

6. REST ASSURED

6 Easy 8 Medium 2 Hard — 16 total questions

1	What is REST Assured? How do you add it to a Maven project?	Easy
2	Explain the given-when-then syntax in REST Assured with a simple GET request example.	Easy
3	How do you pass query parameters and path parameters in REST Assured?	Easy
4	How do you send a POST request with a JSON body in REST Assured?	Easy
5	How do you validate status code and response body in REST Assured?	Easy
6	What is the difference between body() and extract().body() in REST Assured?	Easy
7	How do you extract a value from a JSON response using JsonPath in REST Assured?	Med
8	How do you handle authentication — Basic, Bearer token, OAuth2 — in REST Assured?	Med
9	How do you set up a base URI and default headers to avoid repetition across tests?	Med
10	How do you serialize a Java object to JSON and send it as request body?	Med
11	How do you deserialize a JSON response into a Java POJO using REST Assured?	Med
12	How do you validate a JSON response against a JSON schema in REST Assured?	Med
13	How do you handle multipart file upload requests in REST Assured?	Med
14	How do you log request and response details in REST Assured? How do you log only on failure?	Med
15	How would you build a REST Assured framework with a request builder pattern and reusable specs?	Hard
16	How do you handle pagination in API tests with REST Assured — looping through pages until a condition is met?	Hard

7. API TESTING CONCEPTS

4 Easy 8 Medium 2 Hard — 14 total questions

1	What is the difference between GET, POST, PUT, PATCH, and DELETE? When is PATCH preferred over PUT?	Easy
2	What are HTTP status codes? Explain 200, 201, 400, 401, 403, 404, 422, 500.	Easy
3	What is the difference between authentication and authorization? Give examples.	Easy
4	How do you test a REST API without a UI? What are the key things to validate?	Easy
5	What is JSON schema validation? How do you implement it in API tests?	Med
6	How do you handle OAuth 2.0 authentication in API test automation?	Med
7	How would you test pagination in an API? What edge cases would you cover?	Med
8	What is the difference between SOAP and REST? Have you tested SOAP APIs?	Med

9	How do you perform contract testing? What is Pact and when would you use it?	Med
10	How would you design an API test framework from scratch? What layers would it have?	Med
11	How do you handle API test data to avoid conflicts in parallel runs?	Med
12	What is idempotency in APIs? Why does it matter for test design?	Med
13	How would you test a GraphQL API? How is it different from REST API testing?	Hard
14	Design a test strategy for a microservices-based payment API with 15 services.	Hard

8. FRAMEWORK DESIGN

3 Easy 9 Medium 2 Hard — 14 total questions

1	Walk me through your current Playwright framework. What decisions did you make and why?	Easy
2	What is the difference between TestNG and JUnit 5? What are the key differences?	Easy
3	How do you implement reporting in your framework? What should a good test report contain?	Easy
4	How do you manage test data in your framework? What approaches have you used?	Med
5	Explain Page Object Model vs Screenplay Pattern. When would you choose one over the other?	Med
6	How do you handle test configuration for multiple environments in your framework?	Med
7	What is Dependency Injection in test frameworks? How does Playwright fixtures implement it?	Med
8	How do you handle test retries for flaky tests? What is the risk of automatic retries?	Med
9	How do you implement logging in a test framework? What should be logged and what should not?	Med
10	What is the Builder pattern? Write a code example of a test data builder for an Employee object.	Med
11	What is the Factory pattern? How would you use it in a Page Object framework?	Med
12	How do you measure test framework health? What metrics do you track?	Med
13	How do you handle test parallelism at framework level? What are the risks?	Hard
14	Design a framework that supports both UI and API testing with shared utilities and reporting.	Hard

9. JENKINS

6 Easy 10 Medium 2 Hard — 18 total questions

1	What is Jenkins? What problem does it solve in a test automation context?	Easy
2	What is the difference between a Freestyle job and a Pipeline job in Jenkins?	Easy
3	What is a Jenkinsfile? What are the two syntaxes — declarative vs scripted?	Easy

4	What are Jenkins stages and steps? Write a basic pipeline with checkout, build, and test stages.	Easy
5	How do you trigger a Jenkins job automatically on a code push?	Easy
6	What are Jenkins environment variables? Name 5 built-in ones you use regularly.	Easy
7	How do you pass parameters to a Jenkins pipeline job?	Med
8	How do you run tests in parallel across multiple agents in Jenkins?	Med
9	How do you archive test reports and artifacts in Jenkins? How do you publish TestNG or Playwright HTML reports?	Med
10	How do you configure email or Slack notifications on build failure in Jenkins?	Med
11	What are Jenkins agents and master? How do you set up a distributed build?	Med
12	How do you manage credentials and secrets in Jenkins securely?	Med
13	What are Jenkins shared libraries? How would you use them to share pipeline code across projects?	Med
14	How do you schedule a Jenkins job using cron syntax? Give an example for nightly regression.	Med
15	How do you handle a failing Jenkins build — what is your debugging approach?	Med
16	How do you integrate Jenkins with GitHub — webhooks, PR builds, and branch filtering?	Med
17	Design a complete Jenkins pipeline for a Playwright test suite — from code checkout to report publishing.	Hard
18	How would you set up a Jenkins pipeline that runs smoke tests on every PR and full regression nightly?	Hard

10. CUCUMBER / BDD

6 Easy 9 Medium 3 Hard — 18 total questions

1	What is BDD? What problem does it solve compared to traditional test automation?	Easy
2	What is Gherkin? Explain Given, When, Then, And, But with a real example.	Easy
3	What is the difference between a Feature file and a Step Definition file?	Easy
4	What are Cucumber tags? How do you use them to run a subset of tests?	Easy
5	What is a Background in Cucumber? When would you use it?	Easy
6	What is a Scenario Outline? How does it enable data-driven testing in Cucumber?	Easy
7	How do you pass data from a feature file to step definitions using data tables?	Med
8	What are Cucumber hooks — @Before, @After, @BeforeStep, @AfterStep? How do you use them?	Med

9	How do you share state between step definitions in Cucumber without static variables?	Med
10	What is PicoContainer or Guice in Cucumber? Why is dependency injection needed in step definitions?	Med
11	How do you integrate Cucumber with TestNG or JUnit 5? What is the runner class?	Med
12	How do you generate Cucumber HTML or Allure reports? What information should they contain?	Med
13	What is the difference between Cucumber expressions and regular expressions in step definitions?	Med
14	How do you handle Cucumber tests in a CI/CD pipeline — tagging strategy, parallel execution?	Med
15	What are the anti-patterns in BDD — over-specifying UI steps, imperative vs declarative style?	Med
16	How would you structure a Cucumber + Selenium + Java framework end to end? Walk through every layer.	Hard
17	How do you run Cucumber scenarios in parallel? What are the challenges with shared state?	Hard
18	Design a BDD strategy for a financial services application — who writes features, how are they reviewed, how are they maintained?	Hard

11. TESTNG IN DEPTH

6 Easy 10 Medium 1 Hard — 17 total questions

1	What are the basic TestNG annotations? Explain @Test, @BeforeMethod, @AfterMethod, @BeforeClass, @AfterClass.	Easy
2	What is the difference between @BeforeSuite and @BeforeClass in TestNG?	Easy
3	How do you run a specific test group in TestNG? How do you define groups?	Easy
4	What is testng.xml? What are the key elements — suite, test, classes, methods?	Easy
5	How do you skip a test conditionally in TestNG?	Easy
6	What is the difference between @Test(enabled=false) and throwing SkipException?	Easy
7	How do you implement data-driven testing in TestNG using @DataProvider?	Med
8	How do you run tests in parallel in TestNG? What are the parallel modes — methods, classes, tests, instances?	Med
9	What is ITestListener in TestNG? Write a listener that logs pass/fail/skip with timestamps.	Med
10	What is IRetryAnalyzer? How do you implement automatic retry for flaky tests?	Med
11	How do you handle test dependencies in TestNG using dependsOnMethods?	Med
12	What is soft assertion in TestNG? When would you use SoftAssert vs hard assert?	Med

13	How do you generate custom reports using IReporter in TestNG?	Med
14	What is the difference between @Factory and @DataProvider in TestNG?	Med
15	How do you configure TestNG to run tests in a specific order? When is this a bad practice?	Med
16	How do you integrate TestNG with Maven Surefire plugin for CI execution?	Med
17	Design a TestNG suite configuration for running smoke, regression, and API tests with different parallel settings.	Hard

12. SQL FOR TESTERS

6 Easy 9 Medium 2 Hard — 17 total questions

1	What is the difference between WHERE and HAVING clause in SQL?	Easy
2	Write a query to find all employees with salary greater than 50000.	Easy
3	What is the difference between INNER JOIN, LEFT JOIN, RIGHT JOIN, and FULL OUTER JOIN?	Easy
4	Write a query to count the number of employees in each department.	Easy
5	What is the difference between DISTINCT and GROUP BY?	Easy
6	How do you find duplicate records in a table? Write the SQL query.	Easy
7	Write a query to find the second highest salary from an Employee table.	Med
8	What is the difference between DELETE, TRUNCATE, and DROP?	Med
9	How do you verify test data in a database after an API call? What queries would you write?	Med
10	What are indexes in SQL? How do they affect query performance in large test data sets?	Med
11	What is a subquery? Write an example to find employees earning above average salary.	Med
12	What are aggregate functions — COUNT, SUM, AVG, MIN, MAX? Write a query using all of them.	Med
13	How do you write a query to find transactions from the last 30 days?	Med
14	What is the difference between UNION and UNION ALL?	Med
15	How do you validate data integrity between two tables — e.g. checking referential integrity after a test run?	Med
16	Write a query to pivot rows to columns — e.g. show test results by status per sprint.	Hard
17	How would you use SQL to analyze test execution data — find flaky tests, longest running tests, failure trends?	Hard

13. DOCKER

5 Easy 8 Medium 2 Hard — 15 total questions

1	What is Docker? What problem does it solve for test automation?	Easy
2	What is the difference between a Docker image and a Docker container?	Easy
3	What is a Dockerfile? Write a basic Dockerfile for a Java Maven test project.	Easy
4	What are the most commonly used Docker commands? Explain build, run, ps, stop, rm, logs.	Easy
5	What is Docker Hub? How do you pull and push images?	Easy
6	What is the difference between CMD and ENTRYPOINT in a Dockerfile?	Med
7	How do you pass environment variables to a Docker container? How is this useful for test configuration?	Med
8	What are Docker volumes? How do you use them to persist test reports outside a container?	Med
9	What is Docker Compose? Write a docker-compose.yml to run Selenium Grid with hub and Chrome/Firefox nodes.	Med
10	How do you run Playwright tests inside a Docker container? What base image would you use?	Med
11	How do you debug a failing test run inside a Docker container?	Med
12	What is the difference between Docker network modes — bridge, host, none?	Med
13	How do you optimize Docker image size for a test automation project?	Med
14	How do you integrate Docker with Jenkins to run tests in isolated containers per build?	Hard
15	Design a Docker-based test execution setup for parallel cross-browser testing with Selenium Grid.	Hard

14. CI/CD CONCEPTS

5 Easy 8 Medium 2 Hard — 15 total questions

1	What is CI/CD? What is the difference between Continuous Integration and Continuous Delivery?	Easy
2	What is a CI/CD pipeline? What are the typical stages?	Easy
3	What is the role of an SDET in a CI/CD pipeline?	Easy
4	What is the difference between a build artifact and a test artifact?	Easy
5	What are GitHub Actions? How do they differ from Jenkins?	Easy
6	How do you trigger tests only when relevant files change in a CI pipeline?	Med
7	How do you handle test failures in CI — fail fast vs fail safe strategies?	Med
8	How do you publish test reports in a CI pipeline? What formats does your pipeline support?	Med
9	What is a quality gate? How would you implement one that blocks deployment if test coverage drops below 80%?	Med

10	How do you manage secrets and environment-specific config in CI/CD pipelines?	Med
11	What is a deployment pipeline vs a test pipeline? How do they interact?	Med
12	How do you implement smoke tests as a post-deployment verification step?	Med
13	What is blue-green deployment? How does it affect your test strategy?	Med
14	How do you handle database migrations in a CI pipeline safely with test data?	Hard
15	Design a complete CI/CD pipeline for a fintech application — from PR to production, including all test stages.	Hard

15. MAVEN

6 Easy 6 Medium 2 Hard — 14 total questions

1	What is Maven? What problem does it solve compared to managing JARs manually?	Easy
2	Explain the Maven build lifecycle. What are the key phases in order?	Easy
3	What is pom.xml? Explain groupId, artifactId, and version.	Easy
4	What is the difference between dependencies and plugins in Maven?	Easy
5	What is the difference between compile, test, provided, and runtime dependency scopes?	Easy
6	How do you run a specific test class or method using Maven command line?	Easy
7	What is the Maven Surefire plugin? How do you configure it for TestNG or JUnit 5?	Med
8	How do you configure parallel test execution using Maven Surefire plugin?	Med
9	What is the difference between mvn install and mvn deploy?	Med
10	What are Maven profiles? How do you use them to run tests against different environments?	Med
11	What is dependency exclusion in Maven? Why would you need it?	Med
12	What is a Maven multi-module project? How would you structure a test framework as one?	Med
13	How do you resolve dependency conflicts in Maven? What is the nearest-definition rule?	Hard
14	How do you publish your test framework as a Maven artifact to a private Nexus or Artifactory repository?	Hard

16. GRADLE

5 Easy 6 Medium 2 Hard — 13 total questions

1	What is Gradle? How is it different from Maven?	Easy
2	What is build.gradle? What are the key sections — plugins, dependencies, tasks?	Easy

3	What is the difference between implementation, testImplementation, and compileOnly in Gradle?	Easy
4	How do you run a specific test class or method using Gradle command line?	Easy
5	What is the Gradle wrapper (gradlew)? Why is it important for team consistency?	Easy
6	How do you configure the Gradle test task to use TestNG or JUnit 5?	Med
7	How do you configure parallel test execution in Gradle?	Med
8	What are Gradle tasks? How do you create a custom task?	Med
9	How do you define and use Gradle profiles for different environments?	Med
10	What is Gradle build cache and how does it speed up CI builds?	Med
11	What is the difference between Groovy DSL and Kotlin DSL in Gradle?	Med
12	How does Gradle incremental build work? How does it decide what to rerun?	Hard
13	How would you structure a multi-module Gradle project for a framework with UI, API, and shared utilities?	Hard

17. GIT

6 Easy 7 Medium 2 Hard — 15 total questions

1	What is the difference between git pull and git fetch?	Easy
2	What is the difference between git merge and git rebase? When would you use each?	Easy
3	What is the difference between git reset and git revert? Which is safer on a shared branch?	Easy
4	What is a pull request? What should a good PR contain for a test automation change?	Easy
5	What is .gitignore? What files should be ignored in a test automation project?	Easy
6	What is git stash? When would you use it?	Easy
7	What is the difference between git merge --squash, regular merge, and rebase?	Med
8	What is a merge conflict? Walk through the steps to resolve one.	Med
9	What is git cherry-pick? Give a real scenario where you would use it in test automation.	Med
10	What is trunk-based development vs feature branching? Which is better for test automation repos?	Med
11	How do you set up a pre-commit hook to run linting or tests before every commit?	Med
12	What is git bisect? How would you use it to find which commit broke a test?	Med
13	How do you manage secrets and credentials in a git repository safely?	Med

14	How would you set up branch protection rules and enforce PR reviews for a test automation repo?	Hard
15	Explain a Git workflow your team follows end-to-end — from writing a test to merging to main and triggering CI.	Hard

18. SYSTEM DESIGN

3 Easy 6 Medium 3 Hard — 12 total questions

1	How would you define the test strategy for a new project joining mid-development?	Easy
2	What is the difference between functional and non-functional testing? Give examples of each.	Easy
3	What is shift-left testing? How have you practiced it in your current role?	Easy
4	What is the test pyramid? How does it apply to a microservices architecture?	Med
5	How would you test a payment gateway end-to-end? What scenarios would you cover?	Med
6	How do you decide what to automate and what to test manually?	Med
7	How would you handle a situation where the regression suite takes 4 hours to run?	Med
8	How do you test for security vulnerabilities as an SDET? What basic checks do you perform?	Med
9	How do you approach testing in an agile sprint-based environment?	Med
10	Design the test architecture for a fintech application processing 1 million transactions per day.	Hard
11	How would you test a distributed system where services communicate asynchronously via message queues?	Hard
12	How would you build a test observability system — tracking flakiness, coverage gaps, and failure trends?	Hard

19. BEHAVIORAL

4 Easy 10 Medium 0 Hard — 14 total questions

1	Tell me about yourself. Keep to 2-3 minutes with a technical focus.	Easy
2	Why are you leaving EPAM? Practice a clean, positive answer.	Easy
3	What is your biggest weakness as an SDET?	Easy
4	Where do you see yourself in 3 years? Align to Lead/Architect path.	Easy
5	Tell me about a time you disagreed with a developer about a bug. How did you handle it?	Med
6	Describe a situation where you delivered under tight deadline pressure. What did you cut and why?	Med

7	Tell me about the most complex framework you have built. What was hard and what would you do differently?	Med
8	Describe a time you identified a critical bug late in the cycle. What happened?	Med
9	How have you mentored junior engineers? Give a specific example.	Med
